GRÜEZI

The 1st day of competition is over and the decisions in the Sprint Men & Women are made. Respect for your great performance! With a few photos we look back on the 1st day of competition and the Flower Ceremony at Gallusplatz. Tomorrow, we will expect another exciting competition in the Middle category in Gais/Hirschberg. Good luck to all of you! Samuel

INCLINES ARE PART OF THE CITY OF ST. GALLEN

The qualification race in the sprint opened the three-day event programme and showed the athletes that the city of St. Gallen has some arduous inclines to offer. With the start at the Marktplatz and the finish in the Square of the HSG, the four qualification runs meant to be a mental nut to crack as well as hard work for the legs. However, the finish over the red carpet into the Square was rewarding. The best 60 men and 48 women qualified for the A-final in the afternoon and were admitted to fight for the sought-after medals. The women launched the final runs through the Old Town and the medals were won by students from three different universities. In the subsequent men's final, the podium was exclusively taken by competitors of Swiss universities.

Many curious passers-by followed the competition around Gallusplatz with great interest. The contenders in the finish area followed the ongoing competition on the big screen and cheered on their team mates. Needless to say, route comparisons via GPS, intermediate rankings and interviews made sure that there were very positive vibes throughout the Gallusplatz.

RESULTS

The winners of the Sprint finals are:

1. Hanne Hilo, University of Helsinki
 2. Eline Gemperle, University of Applied Sciences Northwestern Switzerland
 3. Florence Hanauer, INSA Lyon

DID YOU KNOW?

Did you know that the Biber that were handed over to the medal winners at the Flower Ceremony today come from the *Conditorei dreischiibe* in Herisau? It is part of the *dreischiibe organization*, a social enterprise that creates new perspectives for people with a mental impairment with jobs and training places as well as day structure offers, supported by a specialised team of experts. Biber is a tasty and sweet speciality, a brown honey biscuit filled with an almond paste. This may be the reason for the origin of its name (in German Bienenbrot or in English bee bread). Biber comes from the Eastern Swiss cantons of St. Gallen and both Appenzell and is popular throughout Switzerland. Don't miss out on to trying a Biber

SATURDAY, 26 AUGUST 2023
